PHOTOSHOP VERSION

SPREADSHEETS & CARD CONTENT

The Photoshop version of this card template leverages the power of Photoshop's Data Sets and Variables. This means that certain elements of the card template can be changed by inputting your desired information into the provided spreadsheet, saving the spreadsheet as a Tab Delimited .txt file, and then importing that Tab Delimited .txt file into Photoshop. Multiple versions of the card can be created by inputting data into the provided spreadsheet. **Using the spreadsheet is the fastest and most organized way to build a deck of cards with this template.**

For detailed information on how to create a deck of cards in which each card consists of different information and artwork, visit the link below to download our .pdf tutorial on Photoshop Data Sets and Variables. You'll want to open Tutorial 01 – Intuitive.pdf and read through Focus 03: Create Data Sets (pages 7-9) and Focus 04: Import Data Sets (pages 10-14).

TUTORIAL DOWNLOAD PAGE: <https://manifestationccs.com/tutorials/01-photoshop-variables-data-sets/>

If you have any questions about this card template feature, feel free to contact us through our [CONTACT](#) page.

To see this card's Data Sets and Variables in action: 1) Go to Image > Apply Data Set, 2) Select the example Data Set in the popup window (tick/check "Preview").
