MONTH 07 | INSTRUCTION MANUAL

UTILIZATION LICENSE

By acquiring and/or downloading this digital template you agree to and accept the following licensing conditions:

1. You are granted an ongoing, non-exclusive, Earth-wide and universal license to utilize this digital template.
2. You agree not to sell, the digital template; in its entirety and/or as separate parts/ files. This applies Earth-wide and universally.
3. This digital template is for your private use only. This license maintains that the downloader/acquirer be held legally accountable for any and all violations of this license.
4. You agree to restrict the utilization of this digital template to the creation of any number of prototypes (physical prints and/or digital files) designed for play-testing and/or presentation purposes.
5. You agree not to sell any prototypes (physical prints and/or digital files) with or without layer information, or editable design elements derived from this digital template.
6. You agree not to utilize this digital template to create any final end products/ creations (physical prints and/or digital files with or without layer information, or

editable design elements) for personal use, business use and/or client use.

7. You are free to edit, change, modify and/or manipulate this digital template for your private use.
8. Any derivative works created through any utilization of this digital template (in physical or digital formats) containing layer information and/or editable design elements may not be sold, distributed, or made publicly available.
9. You are not permitted to sell, distribute, or make publicly available any works, goods, templates, bundles, file combinations, stock, tools or source files that include this digital template (as a whole or in part) as a physical print and/or as digital files containing layer information and/or editable design elements.
10. Selling, distributing, or making publicly available any single, or multiple editable design element(s) (altered or unaltered) originated from this digital template is strictly prohibited.
11. This license can be terminated if any of its terms/conditions are breached.

The author/creator of this digital template (Unknown Depths) maintains all ownership and rights to this digital template and provides this digital template to downloaders/ users upon agreement and acceptance of the conditions of this license.

PHOTOSHOP VERSION

SPREADSHEETS & CARD CONTENT

The Photoshop version of this card template leverages the power of Photoshop's Data Sets and Variables. This means that certain elements of the card template can be changed by inputting your desired information into the provided spreadsheet, saving the spreadsheet as a Tab Delimited .txt file, and then importing that Tab Delimited .txt file into Photoshop. Multiple versions of the card can be created by inputting data into the provided spreadsheet. **Using the spreadsheet is the fastest and most organized way to build a deck of cards with this template.**

For detailed information on how to create a deck of cards in which each card consists of different information and artwork, visit the link below to download our .pdf tutorial on Photoshop Data Sets and Variables. You'll want to open Tutorial 01 – Intuitive.pdf and read through Focus 03: Create Data Sets (pages 7-9) and Focus 04: Import Data Sets (pages 10-14).

TUTORIAL DOWNLOAD PAGE: <https://manifestationccs.com/tutorials/01-photoshop-variables-data-sets/>

If you have any questions about this card template feature, feel free to contact us through our [CONTACT](#) page.

 To see this card's Data Sets and Variables in action: 1) Go to **Image > Apply Data Set**, 2) Select the example Data Set in the popup window (tick/check "Preview").

TEXT ELEMENTS

CARD FRONT

- The "Text" layer group contains "Title," "Sub-Title," "Paragraph," and "Footer" text layers. These layers have been defined as Photoshop Variables and as such can be edited by using the provided spreadsheet.
- The "Icons/Text" layer group contains "Text ##" text layers. These layers have been defined as Photoshop Variables and as such can be edited by using the provided spreadsheet.
- All text layers have Photoshop layer styles applied to them, designed to add to the aesthetic of the card template's visual theme.

CARD REAR

- The "Logo/Symbol (w/ Transparency)" layer group contains "Rear Title" and "Sub-Title" Photoshop text layers. Type in your preferred text and position the text to your liking. Layer Styles and effects have been applied to the "Logo/Symbol (w/ Transparency)" layer group, and will be applied to any text within the group.

TEXT ELEMENTS

FONTS

- Exo Light: <https://www.fontsquirrel.com/fonts/exo>
- Exo Medium: <https://www.fontsquirrel.com/fonts/exo>

ICON ELEMENTS

CARD FRONT

- The "Icons/Text" layer group contains "Icon ## (Placeholder)" layers used for precise alignment and positioning of icons. These layers consist of two 1 pixel dots positioned at the upper left and lower right corners of an invisible square. These layers have been defined as Photoshop Variables and as such can be edited by using the provided spreadsheet.
- All "Icon ## (Placeholder)" layers have Photoshop layer styles applied to them, designed to add to the aesthetic of the card template's visual theme. These layers are designed to work with flat, single color icons containing transparency information.
- Icon Dimensions (WxH): Icon 01-02 (101x101 pixels), Icon 03-06 (48x48 pixels). **Use the provided "Icon 01-02.psd" and "Icon 03-06.psd" files to create icon .png files sized to the right dimensions for the template.**

CARD REAR

- Place single color logos/symbols containing transparency information in the "Logo/Symbol (w/ Transparency)" layer group to have the card's custom layer style applied to your logo/symbol and/or text.

ARTWORK

CARD FRONT

- Inside of the Artwork layer group is the "Artwork Placeholder" layer. The Artwork Placeholder layer consists of two 1 pixel dots positioned at the upper left and lower right corners of an invisible rectangle. This layer has been defined as a Photoshop Variable and as such can be edited by using the provided spreadsheet.
- Artwork created for this template should be sized to 825x1016 (WxH) pixels.
- Use the included "Artwork.psd" file to prepare artwork with the right dimensions for this card template.
- This template was designed to work well with illustrations that contain transparency (.png files), as well as illustrations that cover the entire artwork area/space (.jpg files). Illustrations that have transparency information will take advantage of the template's background.

GIMP VERSION

IMPORTING GIMP GRADIENTS

CREATE GRADIENT FOLDER / PATH / DIRECTORY

- 1) In Gimp, go to the "Edit" tab and click "Preferences".
- 2) Expand the "Folders" option by clicking the "+" symbol to the left of the "Folders" icon.
- 3) Click/Select the "Gradients" option.
- 4) Click the "New File/Directory" icon (far left icon that looks like blank paper/file)
- 5) Click the folder icon to the right of the path entry/text field to browse your computer for the folder that will host your Gimp gradient file(s) .ggr. Click "OK".
- 6) The path you selected to the folder that will host the Gimp gradient files is now added to the list of paths/directories. Tick/check your folder's path and click the "OK" button located at the bottom right of the window.

MOVING GRADIENT FILE(S)

- 1) Navigate to the "[Gradients](#)" folder of the Manifestation CCS Card Frames for Prototypes Gimp card template.
- 2) Copy or Cut the "[Card-##_Gradient-##_ggr](#)" file and paste it into your Gimp gradient folder.

TESTING GRADIENT FILE(S)

- 1) In the "Tool Options" panel click in the "Gradient" text field and type in the name of the gradient file you want to use. If you do not see the gradient file listed in the drop-down selection after typing its name in the text field, the gradient file is not located in a path/directory Gimp recognizes. Follow the instructions in the "CREATE GRADIENT FOLDER / PATH / DIRECTORY" section above to set up a Gradient Folder to house Gimp gradient files.

LAYERFX PLUGIN

DOWNLOAD

- Windows (Right-click and save): [layerfx.scm](#)
- Ubuntu GNU/Linux | MAC OS (Right-click and save): [layerfx.2.8.py](#)

INSTALL

- Windows 10 (GIMP 2.8):
 - After downloading the layerfx.scm file from the link above, copy/cut it, and paste it into the following path/directory:
 - [C:\Program Files\GIMP 2\share\gimp\2.0\scripts](#)
- Ubuntu GNU/Linux:
 - After downloading the layerfx.2.8.py file from the link above, copy/cut it, and paste it into the following path/directoy:
 - [/directory/usr/lib/gimp/2.0/plug-ins/](#)
- MAC OS (GIMP 2.8):
 - After downloading the layerfx.2.8.py file from the link above, copy/cut it, and paste it into one of the following paths/directories:
 - (System-wide Script-Fu scripts): [/Applications/GIMP.app/Contents/Resources/share/gimp/2.0/scripts/](#)
 - (Executable & Python plugins): [/Applications/GIMP.app/Contents/Resources/lib/gimp/2.0/plug-ins/](#)

For more detailed instructions visit the following link: https://en.wikibooks.org/wiki/GIMP/Installing_Plugins

TEXT ELEMENTS

CARD FRONT

- The "Text" layer group contains "Title," "Sub-Title," "Paragraph," and "Footer" text layers.
- The "Icons/Text" layer group contains "Text ##" text layers.

CARD REAR

- The layer group "Logo/Symbol (w/ Transparency)" contains "Rear Title (Large)" and "Rear Title (Small)" text layers.

FONTS

- Exo Light: <https://www.fontsquirrel.com/fonts/exo>
- Exo Medium: <https://www.fontsquirrel.com/fonts/exo>

The Text in this template was designed to be viewed with effects generated by the Layer Effects Script-Fu plugin. You will need the GIMP plugin: "LayerFX" to add layer effects to text layers. Download and install the Layer FX plugin using the instructions on the [LayerFX Plugin page](#). All layer effect styling parameters can be found in the [Text & Icon Styling section](#).

ICON ELEMENTS

CARD FRONT

- The "Icons/Text" layer group contains "Icon/Text Area ##" layers created to assist in icon positioning. Position your icons within the boundaries of these layers for the best visual results.
- Icon Dimensions (WxH): Icon 01-02 (101x101 pixels), Icon 03-06 (48x48 pixels). Use the provided "Icon 01-02.xcf" and "Icon 03-06.xcf" files to create icon .png files sized to the right dimensions for the template.

CARD REAR

- Place all logos/symbols with transparency in the "Logo/Symbol(w/Transparency)" layer for effective layer organization within the template.

Icons (and Logos/Symbols) with transparency information (.png files) added to this template should be viewed with effects generated by the Layer Effects Script-Fu plugin. You will need the GIMP plugin: "LayerFX" to add layer effects to icon (and logo/symbol) layers. Download and install the Layer FX plugin using the instructions on the [LayerFX Plugin page](#). All layer effect styling parameters can be found in the [Text & Icon Styling section](#).

ARTWORK

CARD FRONT

- To add artwork to this template open your artwork as a layer (Ctrl+Alt+O) over the "Artwork-Placeholder" layer, and replace it.
- Artwork for this template should be sized to 825x1016 (WxH) pixels. Use the included "Artwork.xcf" file to prepare artwork with the right dimensions for this card template.
- This template was designed to work well with illustrations that contain transparency (.png files), as well as illustrations that cover the entire artwork area/space (.jpg files). Illustrations that have transparency information will take advantage of the template's background.
